

GROSTRONG® PRO-VITA-MIN™

20-5 Tub

A Free-Choice Supplement for Horses on Pasture

Product Number: 11228AAA

A forage only diet, regardless of quality cannot meet all of a horse's mineral and vitamin requirements. Therefore, supplementation is essential to support necessary metabolic processes and achieve optimum performance. Similarly, many forages cannot meet all of a horse's protein and essential amino acid requirements. Supplemental protein may be required based on growth requirements, reproductive stage, and forage quality. GROSTRONG PRO-VITA-MIN 20-5 Tub provides the necessary protein, minerals, and vitamins to complement forages and grains, enabling horses to reach their performance potential. It is an ideal product for meeting nutrient needs under situations that make it difficult to individually supplement horses on a daily basis, such as with pasture or range conditions. GROSTRONG PRO-VITA-MIN 20-5 Tub, backed by over 100 years of formulation and manufacturing expertise, combines the advantages of GROSTRONG® Minerals with high-quality protein sources and can help meet nutrient needs of yearlings, two-year olds, gestating and lactating broodmares, and mature horses. It is the result of unsurpassed formulation expertise and leading edge technology. GROSTRONG PRO-VITA-MIN 20-5 Tub, a Forage First® Vitamin and Mineral Product, is a key component of the Forage First program. Forage First programs combine good-quality forage, GROSTRONG vitamin-mineral products, and energy-based products, when needed, to produce balanced total rations.

Product Description

GROSTRONG PRO-VITA-MIN 20-5 Tub is a high-quality protein-vitamin-mineral supplement packaged in 100- and 200-lb tubs.

Features	Benefits
Tub form	Convenient, palatable product form makes supplementing horses on pasture easy.
Free-Choice feeding	No need to provide supplement on a daily basis; saves labor and decreases time spent feeding.
Multiple, high-quality protein sources	Provides essential amino acids for growth, reproduction, lactation, and maintenance.
Contains GROSTRONG Minerals	Ensures horses receive 28 major minerals, trace minerals, vitamins, and electrolytes (includes salt) in the correct amounts and ratios needed for maintenance, growth, reproduction, and performance.
2:1 calcium to phosphorus ratio	Maximizes mineral availability.
Vitamins A, D, E, and B-complex	Essential for strong bones, healthy eyes and body tissues, reproductive efficiency, and digestive processes.
Portion of vitamin E is natural-source	Protects body tissues from oxidative damages. In this way, vitamin E is vital for protection during health challenges, and may be especially important for working horses as they are more prone to exercise-induced muscle damage. Research shows that natural-source vitamin E is more bio-available than synthetic vitamin E.

Features

Benefits

Features and benefits continued from previous page.

Added Biotin

Support hoof integrity and hair health.

Vegetable oil

Supplies energy; also contributes to hair coat shine and “bloom.”

Recommended Consumption

1—2 lb per horse daily, see Instructions for Feeding.

Ingredients

Corn Distillers Dried Grains with Solubles, Dehulled Soybean Meal, Corn Condensed Distillers Solubles, Soy Flour, Salt, Cane Molasses, Magnesium Oxide, Condensed Fermented Corn Extractives, Corn Germ Meal, Soybean Hulls, Vegetable Oil Refinery Lipid, Monocalcium Phosphate, Dicalcium Phosphate, Calcium Carbonate, Zinc Oxide, Manganous Oxide, Copper Sulfate, Defluorinated Phosphate, Ferrous Sulfate, d-alpha Tocopheryl Acetate and dl-alpha Tocopheryl Acetate (sources of Vitamin E), Biotin, Vitamin A Acetate, Cholecalciferol, Cobalt Carbonate, Calcium Pantothenate, Sodium Selenite, Thiamine Mononitrate, Riboflavin Supplement, Niacin Supplement, Potassium Iodide, Vitamin B12 Supplement.

Feeding Directions

Feed GROSTRONG® PRO-VITA-MIN 20-5™ Tub free-choice to horses on pasture or roughage rations. Make sure animals have adequate pasture or roughage available and are not starved for salt or minerals. Feed GROSTRONG PRO-VITA-MIN 20-5 Tub continuously. Place tubs in pastures near areas frequented by horses, such as watering locations, shade or loafing areas. Place one tub for every 5 horses and place tubs far enough apart to prevent dominant horses from controlling more than one tub. Consumption may vary depending on number of horses per tub, climate, grazing conditions, condition of horses and/or availability of other feeds. Horses should consume 1 to 2 lb per horse daily. In situations where climate and/or other factors result in consumption other than desired, intake of supplement can be increased or decreased by adding or reducing tubs per pasture. Provide adequate forage and supplemental feed as needed to maintain the desired body condition. Provide free access to fresh, clean water at all times. **Consult with a veterinarian or ADM nutritionist for a recommended diet. For more information, visit www.ADMequine.com.**

CAUTION: Consumption of this product by sheep and goats may result in copper toxicity. Follow label directions. Feeding added selenium at levels in excess of 0.3 ppm in the total diet is prohibited.
