

FORAGE FIRST PRIMEGLO

MATURE HORSES

Pro #81578AAA

At ADM Animal Nutrition™, we believe in the Forage First® philosophy, supported by over 100 years of feed manufacturing excellence. Every day, we source the cleanest, most nutritious ingredients for our Ultra-premium Forage First PRIMEGLO® horse feed so you can feed the very best to the one you love the most.

What is the Forage First Philosophy?

At ADM Animal Nutrition we believe horses should be fed the way nature intended, with large amounts of forage making up the majority of the diet. That is why we always put Forage First. We also understand that today's equines require more than forage can provide (no matter how good). That is where the ADM Forage First products come in. Designed to provide the essential nutrients that are lacking in forage, ADM products can meet the needs of your equine partner without loading them up on the unnecessary things their bodies can't use. Feed Forage First, feed ADM, feed the way nature intended.

Forage First PRIMEGLO is an ultra-premium, concentrated feed for mature horses. Forage First PRIMEGLO is formulated to be fed along with good -quality forages. Forage First PRIMEGLO contains HEALTHY GLO™, Omega Flax™, vegetable oil, and highly digestible fiber from alfalfa, beet pulp, and soybean hulls. Forage First PRIMEGLO comes in a soft pellet which is easy for the mature horses to chew.

Inside Tract™

A unique supplement designed to support the gastrointestinal tract that combines the synergy from CitriStim® (an ADM proprietary whole cell yeast), direct fed microbials, and Cell Rate® (a unique blend of nucleotides that support natural cell growth and replication).

Butyric Acid & Added Zinc

Butyric Acid and Zinc combined may strengthen cell junctions in the intestinal tract and lead to improved nutrient absorption. Providing a stronger barrier against toxins, pathogens, and parasites.

Omega Flax™

A rich source of omega 3 essential fatty acids known to have an anti-inflammatory effect.

GROSTRONG® Minerals

A combination of 28 vitamins, minerals, and electrolytes to ensure your senior friend has the nutrients they need.

Natural -Source Vitamin E

More bio-available than synthetic vitamin E. Natural source Vitamin E protects body tissues from oxidative damages. In this way, vitamin E is vital for protection during health challenges, and may be especially important for active horses as they are more prone to exercise-induced muscle damage.

Complexed, Organic Minerals Zinc, Manganese, & Copper

Complexed (organic minerals) minerals are more readily available for absorption compared with inorganic sources which could be crucial to horses with health challenges.

Guaranteed Analysis

Crude Protein	14.00%

Pellet form in 50 lb bag (81578AAA)

FEED THE BEST FOR THE PRIME STAGE OF THEIR LIFE

Feeding Directions

Forage First® PRIMEGLO® horse feed contains 2x the vitamins and minerals as a traditional feed, greatly reducing the feeding rate. Feed 0.2 to 0.4 lb of Forage First® PRIMEGLO® for every 100 lb of body weight (2.2 to 4.4 lb per 1100 lb horse) along with at least Forage First® PRIMEGLO® 2.0 lb of good-quality forage for every 100 lb bodyweight. Divide into at least two meals per day. Adjust feeding rate for each individual horse to maintain the desired body condition. Do not exceed recommended feeding rate. If your horse needs more than 0.4 lb per 100 lb bodyweight of Forage First® PRIMEGLO® to maintain condition, provide HEALTHY GLO® or MOORGLO® high fat/low starch supplement in addition to Forage First® PRIMEGLO®. If your horse needs less than 0.2 lb per 100 lb bodyweight of Forage First® PRIMEGLO® to maintain condition, provide a GROSTRONG® Vitamin and Mineral product according to label directions. Always provide clean, palatable water and salt on a free-choice basis. Any feed changes should be made gradually over 7 to 10 days. Consult with a veterinarian or ADM nutritionist for a recommended diet. For more information, visit www.ADMequine.com.

CAUTION: Consumption of this product by sheep and goats may result in copper toxicity. Follow label directions. Feeding added selenium at levels in excess of 0.3 ppm in the total diet is prohibited.
