

Textured Vegetable Protein

Product Description

TVP textured vegetable protein is a textured product with a fibrous structure that approaches the texture of meat. This product has a multitude of applications such as canned, semi-moist and lightly cooked pet foods. TVP is available in a variety of shapes and colors.

(2) = Calculated

(3) = From database

(4) = Calculated based on corrected amino acid scores (from actual analysis) using protein digestibility of 0.87, FAO/WHO, 1989.

Protein, carbohydrates and fat are all of soybean origin.

*Sodium sulfite is used in the manufacture of the caramel color that is used to produce caramel-colored TVP products (sulfite range in finished product 20-40 ppm); sulfite levels in uncolored TVP products are less than 10 ppm.
