

PROOF OF PERFORMANCE

AminoGain®

Daniel J. Otte

Rushville, Nebraska

"AminoGain has been an outstanding product for our operation. We are able to achieve gains unheard of previously and the cattle stay green and incredibly marketable. Six-hundred weight steers have gained 3.25-4 lb per head daily (using AminoGain 1 CPB with CitriStim® RU #54575CCP). The product is always consistent. The ability to achieve gains for an incredible cost per pound of gain is HUGE in today's world, and the marketability is still there."

Dave Nichols

Nichols Farms
Bridgewater, Iowa

It's not only for feedlot cattle, AminoGain also benefits bull production. Dave Nichols, Nichols Farms, producer of superior beef genetics, states, "...AminoGain has proven to increase gains and feed efficiency and the gain was in muscle not price discounting fat."

Ross Havens

Nichols Farms
Bridgewater, Iowa

"The combination of genetics, nutrition, health, and environment have helped us to surpass the national average feed conversion which is 6.1 pounds of feed per pound of gain. Feeding AminoGain to Nichols' bulls has given

us excellent results. Our IMF percentage has increased by 1%, and REA increased one inch for bulls when ultra sounded at one year of age."

Dean Volk

Battle Creek, Nebraska

AminoGain continues to impress with excellent bull development results. "Using AminoGain has improved the way my bulls have grown and developed. The weight of the bulls along with how they look is very impressive. Along with the added lean tissue gain, there has been a noticeable difference in scrotal circumference. Most notable is how well these bulls continue to grow once customers have bought them and get them home. AminoGain will be a staple in my bull and heifer development program in the future years to come."

Bob Widmer

Malcom, Iowa

AminoGain gave extremely fast gains without fleshiness. Bob Widmer states AminoGain is an excellent program, enabling his cattle to gain extremely fast without getting fleshy and his cattle finish 30 days sooner than with other feed programs. And, an added bonus is the 1-2% increase in dressing percentage that he's seen.

Doug Albertson

Elberon, Iowa

Push'em hard with AminoGain—Doug Albertson states, "AminoGain has been very good for us. I am able to push cattle hard and they gain fast and don't get fleshy. I have seen an improvement in feed/gain, ADG, and dressing percentage by 1-2%. Cattle finish 30 days sooner than the old feeding program I was using."

Jeff Goodin

Valley Oaks Angus
Oak Grove, Missouri

Jeff Goodin, manager of Valley Oaks Feedlot (Valley Oaks Angus) notes that they have fed AminoGain with CitriStim with great results. One of the best things they have observed is calf health, and calves on the AminoGain program gain between 3.5 lb and 7 lb daily, with over 5 lb average on the finishing ration. And, according to Jeff, steaks from cattle on AminoGain taste great!

(AminoGain testimonials continued on next page.)

PROOF OF PERFORMANCE

Mike Henry

Monroe County, Illinois

It's "fairly" easy to win with AminoGain. Mike Henry has grown accustomed to taking top spots at the Monroe County, IL fair with steers fed AminoGain. Over the past three years he's taken home the bragging rights with the top gaining steers.

William Kester

Clearwater, Nebraska

Utilizing AminoGain in William Kester's Hereford bull development program enabled bulls to gain well without showing fat deposition and exhibited good ultrasound scans for rib fat, REA and IMF. Bulls stayed on feed and didn't exhibit feed or digestive problems and tested very fertile.

Dave Van Boening

Blue Hill, Nebraska

Using co-products requires a supplement program designed precisely to complement the nutritional composition of co-products. You can do just that with AminoGain Co-Product Balancer as Dave Van Boening discovered. Over a 210-day feeding period Van Boening's cattle gained an average 3.66 lb per day with 6.79 F/G.

Mark & Debra

Pieper

Pieper Red Angus
Hay Springs, Nebraska

Bigger, stouter bulls are being made possible with AminoGain. "Using AminoGain has allowed our feeding program to catch our breeding program. We have produced bigger, stouter bulls with excellent feet and fertility."

Josh Gall

Clarkson, Nebraska

AminoGain pushes post-weaning weight gain. Josh Gall is very pleased with performance of steer calves fed AminoGain and AMPT™ mineral. Weaned steers had ADG of 4.16 lb from Nov. 1 through Jan. 3, with final weight of 950 lb. Gall has seen significantly higher post-weaning weight gain on the AminoGain program, far surpassing their goal of 900 lb by Jan. 1!

Terrill Strnad

Formoso, Kansas

"I have used the AminoGain product now for several years and have been amazed by the results. Every year Mother Nature seems to deal us with conditions that limit production of quality feedstuffs. AminoGain is a product that bridges the gap that makes these limited feedstuffs perform at top levels. It brings more out of the good-quality feed for super performance. There is no substitute for quality feed or cattle, and I believe AminoGain makes all of my feed that much better."
