

PROOF OF PERFORMANCE

AMPT™ Minerals

Jordan Vander Molen

Pella, Iowa

Doing it right with AMPT Minerals—According to Jordan Vander Molen, he thought he was doing everything right prior to using AMPT Minerals in his registered herd of 120 South Devons. He's tried multiple other brands of minerals but has never gotten the results he's seen since making the switch to AMPT Minerals. One notable difference was the 25% increase in first service AI conception rates. Vander Molen states, "I will never change again!"

Bryan West

New Bloomfield, Missouri

Brood cow nutrition impacts weaning weight. Over a three-month period, Bryan West supplemented brood cows with Mintrate® 40 EF Breeder Tub and once moved to fescue pasture with AMPT-T EF/ Breeder Mineral with RU and IGR. Upon weaning, heifer calves averaged 2.818 lb daily gain and steer calves (implanted) averaged 3.098 lb over the three-month time frame.

Jeremy Poss

Elba, Nebraska

AMPT Minerals for great cow condition and calf weaning weight—Since switching to AMPT Minerals, Jeremy Poss has seen weaned calves come off fall grass in great shape and slightly heavier. Cow condition was also really good in the fall. Poss has also noticed a shortened calving window which hopefully will translate to earlier calves with more pounds on calves in the fall. Poss switched to Roughage Buster® once cows were moved to corn stalks later in the year and found the switch allowed him to lower supplement cost compared to his previous feeding program.

Roger Sudbeck

Hartington, Nebraska

AMPT Minerals for good performance—beef producer Roger Sudbeck states he's been using AMPT Mineral for three years and observed the following in his brood cow herd: cows look great, have good performance, and breedback fast! He preg checked the last two years and only found two open cows out of 165 each year.

John Nafziger

Hopedale Agri Center
Hopedale, Illinois

AMPT Minerals, with better mineral availability, are superior to "traditional" sulfate-based minerals. John Nafziger from Hopedale Agri Center, Inc., states customers have been extremely pleased with consumption especially when using the IGR (insect growth regulator for horn fly control) option.
