

# Swine Feed Additives

## Leading nutritional solutions with unparalleled commitment

ADM is a global leader providing animal nutrition solutions to optimize animal health, performance, profitability and efficiency.

As your global resource, we are always expanding our portfolio of offerings by continually adding the latest proven ingredients and innovations, working to give you an edge in a competitive marketplace.

Our team of industry-defining experts continually capitalize on the vast global resources and expansive network to provide the latest targeted solutions for your specific challenges.

**ANCO FIT** Support ability to adapt to nutritional stressors. AncoFIT is a source of active phytochemicals, functional carriers and viable, naturally occurring microorganisms. Specifically formulated to empower high performing animals to overcome dietary challenge and other stressors, enabling them to attain their performance potential.

**B-TRAXIM** Range of organic trace minerals bound to glycine. Its patented formulation and well-known chemical crystalline structure ensure high stability and increased bioavailability compared to inorganic sources and other less stable organic mineral sources commonly used in the feed industry. B-traxim features the highest metal contents for OTMs in this class.

CU 24% MN 22%  
ZN 26% Fe 22%

**CITRISTIM®** A unique, proven, whole-cell inactivated and proprietary yeast strain from *Pichia guilliermondii*. Beneficial in the diet for all life stages and classes of

animals. CitriStim may help the animal strengthen its defense against health challenges by supporting and optimizing gut function, gut integrity, and body defense responses, strengthening production.

**EMPIRICAL™ NSP** is a multi-enzyme non-starch polysaccharide (NSP) complex for inclusion in swine diets. Empirical NSP enhances utilization of fibrous components of ingredients by improving digestibility and availability of sugars from NSPs which creates opportunities to improve ration cost.

**EMPIRICAL™ PHYTASE** is a bacterial-origin 6-phytase for inclusion in monogastric feeds. The product enables swine to better utilize phytate-bound phosphorus present in plant-based ingredients.

**EMPIRA PRO** is a direct fed microbial. Supports overall performance during stressful situations. Provides a natural option to support optimal microbiome development and maintenance. Useful for all phases of swine diets.

# Swine Feed Additives

**MAGNASWEET** Combines the high intensity sweetener SUCRAM with sophisticated flavors. Stimulates olfactory and gustatory receptors & activates receptors in the gut for a complete sensory experience. Improves feed intake. Ensures regular feed consumption during challenging developmental phases. Minimizes costs: permits variations in feed formulation with consistent flavor and aroma profile.

**NOVA E™** Natural-source vitamin E (D-alpha-tocopherol) which provides antioxidant effects and protection during production stages. Research shows that natural-source vitamin E is more bio-available than synthetic vitamin E.

**PAN-TEK** Unique combinations of molecules that induce olfactory and gustatory stimulation. Tailor-made flavor profiles to suit different animal species, types of feed and customer needs. Strong and stable flavor profile. Ideal tool to enhance feed attractiveness.

**SUCRAM** Unique, high-intensity sweetener and taste enhancer. It is the perfect tool for reaching palatability and feed intake targets. Regarding intensity, 3 bags of Sucram = 40t sugar. Flexible feed formulation and reduced costs: masks bitter & unpalatable tastes associated with high levels of medications and minerals. Intelligent Gut Action: greater nutrient absorption and optimized gut integrity. Ideal tool to improve feed intake and gut health.

**TAKTIK** Unique combinations of technology to fit to customer's specific needs. Tailor-made combinations in custom concentration unique to customer need.

Synergy: Complementary molecules are chosen: "1+1=3"

Gut Effects: optimizes gut function

Technology: use of sophisticated technology to create efficient products

**XTRACT** Standardized combinations of natural and nature-inspired molecules found in plants and spices. Scientific studies and field trials indicate Xtract supports optimal livestock performance.

**XTRACT 6930** Beneficial in the diet for monogastric animals for strengthening optimal production performance.

**XTRACT NATURE** can help monogastric animals maintain zoo-technical performance in challenging conditions by optimizing feed utilization for growth.

Not all products are available in all regions. These ADM brands, make no representation or warranty, whether expressed or implied, as to the reliability, or completeness of the information. The uses and claims should be adapted to comply with the current local/regional regulatory environment.
