

Ruminant Feed Additives

Leading nutritional solutions with unparalleled commitment

ADM is a global leader providing animal nutrition solutions to optimize animal health, performance, profitability and efficiency.

As your global resource, we are always expanding our portfolio of offerings by continually adding the latest proven ingredients and innovations, working to give you an edge in a competitive marketplace.

Our team of industry-defining experts continually capitalize on the vast global resources and expansive network to provide the latest targeted solutions for your specific challenges.

Targeted
solutions
for demanding
challenges

ANCO FIT Support ability to adapt to nutritional stressors. Enhanced support for production longevity of dairy cows, particularly when fed during the transition period to reduce milk production costs.

B-TRAXIM Range of organic trace minerals bound to glycine. Its patented formulation and well-known chemical crystalline structure ensure high stability and increased bioavailability compared to inorganic sources and other less stable organic mineral sources commonly used in the feed industry.

BIURET A controlled release, non-protein nitrogen source. Biuret's predictable and safe rumen ammonia release pattern allows for greater formulation flexibility.

✱ **CITRISTIM**® CitriStim may help the animal strengthen its defense against health challenges by supporting and optimizing gut function, gut integrity, and body defense responses.

CELL RATE® Source of nucleotides that may help nourish natural body processes involved in stressful situations, body defenses and production.

DIPTERACIDE® Get profit-robbing horn flies under control with highly effective Dipteracide (feed-thru methoprene), the solution to a high dollar problem.

✱ **ENDOFIGHTER**® A beneficial solution for cattle grazing on fescue pastures, EndoFighter contains functional ingredients that favorably support production and well-being of cattle.

GARLIUM A unique garlic flavor, highly concentrated and standardized. Easily incorporated into feed with proven efficacy.

CLARIFLY®* An insect growth regulator (diflubenzuron) to be used as part of an integrated pest management program for the control of horn fly, stable fly, house fly and face fly in the manure of cattle and calves.

What can
we help you
solve
today?

PARTNER WITH US

ADM is your strategic partner for new product development and changing nutritional demands. What can we help you solve today?

NEXULIN A standardized rumen-protected capsicum oleoresin, Nexulin has shown beneficial effect on performance of dairy cows. Nexulin supports performance of transition cows while maintaining physiological status. Nexulin aids dairy cows to have a more efficient lactation cycle and is not diet-dependent.

NOVA E™ Natural-source vitamin E (D-alpha-tocopherol) which provides antioxidant effects and protection during production stages. Research shows that natural-source vitamin E is more bio-available than synthetic vitamin E.

☀ **RUMENEXT®** Selected plant extracts for a proven solution to optimize rumen digestion for favorable production responses. Enhances cattle comfort by mitigating the symptoms associated with stress.

RUMATHRIVE®* A proprietary enzyme blend containing Empirical® NSP which improves fiber digestion in cattle diets.

SUCRAM Unique, high-intensity sweetener and taste enhancer. It is the perfect tool for reaching palatability and feed intake targets. Regarding intensity, 3 bags of Sucram = 40t sugar.

☀ **THERMAL CARE™** Blend of unique nutritional components that help cattle cope with higher temperatures and humidity indexes.

XTRACT 6930 Beneficial in the diet with properties shown to potentially help calves by supporting gut function and integrity, strengthening production.

XTRACT CAPS XL has a single active ingredient: capsicum oleoresin (a high capsaicin, concentrated form) which is derived from red chili peppers and known for its positive effect on mammal metabolism.

XTRACT RUMINANT X60-7065 contains a unique blend of phytomolecules. The encapsulation provides protection of the ingredients, homogeneous particle size for optimal flowability, and equal proportion of active ingredients in each particle.
