

Today's performance horses are challenged with a multitude of stressors including exercise, hauling, and stall confinement. Additionally, they are typically fed larger amounts of concentrates (i.e., commercial feeds and cereal grains) to support high energy requirements, which may lead to a suboptimal gastric environment, ultimately causing stomach discomfort. In fact, an **estimated 90% of all performance horses experience gastric distress** which can negatively affect performance, attitude, and overall health. **Forage First® GS** provides needed nutritional support for optimal gastric health. Its unique blend of ingredients support a healthy gastric pH while helping protect and strengthen the stomach lining.

### ACES™

ACES is a unique, amino acid supplement for equine of all ages and performance levels. It supports muscle development and helps maintain muscle mass. ACES combines Cell Rate® with amino acids that are recognized to help supply an athletic horse with nutrients needed for strength, health, and stamina.

### INSIDE TRACT™

Inside Tract combines Cell Rate® with ingredients known to provide nutritional support for gastrointestinal health, help support and maintain a positive gastrointestinal environment, and provide nutritional support needed during stress.

### Forage First® Summer Care

A supplement for working horses to provide nutritional support for heat abatement specifically formulated to help support your horse through the hot summer months.

### GROSTRONG® Vit. & Minerals

GROSTRONG vitamin and minerals provide 28 necessary minerals and vitamins to complement forages and grains allowing horses to reach their performance potential.

### Cellarator® Turbo Paste

Cellarator Turbo Paste is a unique, 3-in-1, fast-acting, oral paste that combines the power of Cell Rate with probiotics, electrolytes, and vitamin E to support performance, deter dehydration, and provides nutritional support needed during stress.

# Forage First® GS

In order to help support equine gastric health, ADM Animal Nutrition is proud to offer **Forage First GS!** Through a unique blend of carefully selected ingredients, this top-dress supplement is specifically formulated to **support a healthy gastric pH** while helping protect and strengthen gastric mucosa.

With **alfalfa meal as the first ingredient**, Forage First GS delivers a unique triple action formula including a proprietary mineral complex, lecithin, and pectin to help support a healthy stomach.

The **proprietary mineral complex** provides marine-derived calcium and magnesium in a unique honeycomb structure. This serves as a strong buffer in the stomach, helping neutralize gastric acid for a healthy pH.

**Lecithin is a naturally-occurring phospholipid** derived from soybeans. It can interact with the gastric mucosa, helping strengthen the lining of the stomach at the cellular level.

Derived from **chicory root, pectin is a water-soluble fiber that can form a gel inside** the gastrointestinal tract increasing viscosity. This higher viscosity of stomach content slows rate of passage through the stomach which may help protect the mucosa from hydrochloric acid.

Management practices for today's modern performance equine puts them at a higher risk for gastric discomfort and distress. **Including Forage First GS as a part of a horse's daily ration can help support a healthy gastric environment.**

## Guaranteed Analysis

Crude Protein (min)	17.0%
Crude Fat (min)	2.0%
Crude Fiber (max)	22.0%
Acid Detergent Fiber (max)	25.0%
Neutral Detergent Fiber (max)	30.0%
Calcium (min) 5.4% (max)	6.45%
Phosphorus (min)	0.45%
Magnesium (min)	1.5%
Copper (min)	200 ppm
Zinc (min)	600 ppm
Selenium (min)	0.6 ppm
Vitamin E (min)	500 IU/lb

## Ingredients

Dehydrated Alfalfa Meal, Dehulled Soybean Meal, Calcite, Magnesium Carbonate, Soy Lecithin, Dried Chicory Root, Magnesium Oxide, Brewers Dried Yeast (*Saccharomyces Cerevisiae*), Vegetable Oil, Monocalcium Phosphate, Vitamin E Supplement, Zinc Sulfate, Sodium Selenite, Copper Sulfate, Manganese Sulfate, Artificial Flavor.

## Feeding Directions

Forage First GS is designed to be fed as a top-dress and/or snack. Feed at a rate of 15 g per 100 lb of body weight per meal. An average horse weighing 1,000 lb would receive 0.33 lb per meal. For best results, feed this product in three to four meals/snacks per day (total amount fed per day – 1 to 1.3 lb). Do not exceed four meals/snacks per day at the recommended rate. This product is not a complete feed, additional supplementation is required. Provide clean, palatable water at all times.
