

## **ADM Animal Nutrition™ Standard Floor Stock Medication Changes in Some of Their MoorMan's® ShowTec® Feeds**

January, 20, 2017 – As most in the industry are aware, effective January 1, 2017, the FDA implemented new rules regarding use of feed medications in animals, including expansion of requirements for Veterinary Feed Directives (VFD). In response to these changes, ADM Animal Nutrition, a division of Archer Daniels Midland Company (NYSE: ADM), has made changes in medications offered in standard floor stocked MoorMan's ShowTec products to remain fully compliant.

As a general rule, ADM's industry leading MoorMan's ShowTec swine show feed prestarters and starters contain Denagard®\* (tiamulin) and grower / finishers contain BMD®\* (bacitracin methylene disalicylate). These products also contain ADM proprietary functional ingredients including natural-source vitamin E, CitriStim®, PremiDex™, and Energy Burst™, which have been proven to be very effective. Any request for a ShowTec product that contains a medication on the FDA's VFD list (includes CTC, Pulmotil®\* and NuFlor®\*) will require submission of a VFD and will be available to customers with minimum production runs.

While the standard medications in many of the show pig ShowTec complete feeds have changed, customers should rest assured the high-quality of these feeds remains unchanged. MoorMan's ShowTec ruminant show feed standard medications remain virtually unchanged with continued availability of most current medications not requiring a VFD.

"We have looked at this from every angle to determine the best solution for our many MoorMan's ShowTec customers," said Bruce McClain, DVM, ADM show feed business manager. "We are confident that we are providing the absolute best solution available in our standard floor stock products with flexibility to meet any special needs. With the availability of prescription water medications and the continued availability of injectable medications, feeders should be able to maintain the high performance and winning results that they have enjoyed in the past."

### **About ADM Animal Nutrition™**

ADM Animal Nutrition is a leading manufacturing, nutrition and marketing business offering a wide range of innovative products for the animal nutrition market. Known as a global leader in amino acids, ADM Animal Nutrition also offers consistent, high-quality feed products, supplements, premixes, custom ingredient blends and specialty feed ingredients designed to provide leading-edge solutions, enabling our customers to meet and optimize animal health and nutrition goals.
