## Pig Mix/Premix

A merger of science, performance and profitability for starting pigs

### Grind and Mix Starting Supplements Quick Reference Guide

***The MotivAte® Starting Pig Program is a merger of science, performance, and profitability, enabling starting pigs to achieve optimal, economical growth in today's competitive market.***

#### **12287 MotivAte Pig Mix 700**

*A high-quality supplement specially designed to be mixed with grain and protein in grind and mix rations for starting pigs weighing 13 to 25 lb.*

- Variable inclusion rate from 200 to 700 lb, depending on weight of pig (rations for pigs 15-25 lb should also include MotivAte Grower 75 PMX )
- Contains plasma protein, high-quality milk products, fish meal, and synthetic amino acids
- Provides high-quality, balance of major and trace minerals, vitamins A, D, E and B-complex
- CitriStim®, an ADM proprietary feed ingredient that may favorably impact the gut microbial population
- Empirical™, a multi-enzyme, non-starch polysaccharide (NSP) complex which enhances utilization of fibrous components of ingredients by improving digestibility and availability of sugars from NSPs which creates opportunities to lower ration cost
- Direct fed microbial produces a variety of enzymes shown in studies to have a positive affect on nutrient digestion
- Chromium propionate (organic source) supports efficient energy utilization
- Natural-source vitamin E and selenium yeast (organic source) support immune system function and offer better bioavailability

## Pig Mix/Premix

### 12288 MotivAte Grower 75 PMX

A high-quality premix specially designed to be mixed with grain and protein in grind and mix rations for starting pigs weighing 25 to 50 lb. Grower 75 PMX can also be used in rations for pigs weighing 15-25 lb when MotivAte Pig Mix 700 is also included in the diet.

- Contains synthetic amino acids to help efficiently balance the ration for maximum and efficient growth
- Provides high-quality, balance of major and trace minerals, vitamins A, D, E and B-complex
- Empirical<sup>™</sup>, a multi-enzyme, non-starch polysaccharide (NSP) complex which enhances utilization of fibrous components of ingredients by improving digestibility and availability of sugars from NSPs which creates opportunities to lower ration cost
- Inclusion of phytase increases phosphorus utilization from plants, reducing need for supplemental phosphorus and excretion of phosphorus into the environment
- Direct fed microbial produces a variety of enzymes shown in studies to have a positive affect on nutrient digestion
- Natural-source vitamin E supports immune system function and offers better bioavailability
