

ADM Animal Nutrition Announces Expansion, Modernization of Feed Plant in Quincy, Illinois

- *New, state-of-the-art facility will offer expanded capacity and non-medicated product capabilities to meet evolving customer needs*

DECATUR, Ill., Nov. 1, 2016—Archer Daniels Midland Company (NYSE: ADM) announced today that it will build a new, modern feed facility to replace its current operations in Quincy, Illinois.

“We are excited to invest in a new, state-of-the art feed plant to serve our commercial and consumer customers throughout the United States,” said Brent Fenton, president of ADM Animal Nutrition. “Our new plant will centralize our Quincy production lines into a single, modern facility, allowing us to better and more efficiently meet customer needs, including increasing demand for unique pressed tubs, commercial feeds and specialty ingredients.

“From our new plant in Glencoe, Minnesota and new facilities in China, to our under-construction facility in Effingham, Illinois and this soon-to-be started plant in Quincy, ADM Animal Nutrition is continuing to aggressively grow and improve,” Fenton added. “Our goal is to be the go-to animal nutrition partner for customers around the globe.”

The new facility will feature:

- Expanded warehouse space to serve our customers more quickly and efficiently.
- Enhanced capability to serve increased demand for ADM products.
- Dedicated feed line for non-medicated product.
- Automated packaging and process controls.
- Unique pressed tubs for multiple species.

ADM is working with local permitting authorities and plans to begin construction in the near future, with a targeted completion date of mid-2018. The current Quincy facility will remain operational during construction.

About ADM

For more than a century, the people of Archer Daniels Midland Company (NYSE: ADM) have transformed crops into products that serve the vital needs of a growing world. Today, we’re one of the world’s largest agricultural processors and food ingredient providers, with more than 32,300 employees serving customers in more than 160 countries. With a global value chain that includes 428 crop procurement locations, 280 ingredient manufacturing facilities, 39 innovation centers and the world’s premier crop transportation network, we connect the harvest to the home, making products for food, animal feed, industrial and energy uses.
