## Benefits

- Provides a complete and balanced micronutrient profile to help meet the nutrient requirements across all-life stages
- Improves absorption and bioavailability to support immune function, strong bones and cartilage, reproductive function, and overall performance
- More bioavailable than traditional calcium sources and helps support a healthy gastric pH
- Supplies essential nutrients for vibrant “shine” and “bloom” year-round
- Provides essential nutrients like biotin and zinc to help reduce cracking, chipping, and brittleness, supporting overall hoof integrity and durability
- Protects body tissues from oxidative damage. In this way, vitamin E is vital for protection during health challenges, and may be especially important for working horses as they are more prone to exercise-induced muscle damage. Research shows that natural-sourced vitamin E is more bio-available than synthetic vitamin E.
